North East Ontario Autism Program

Foundational Services

Teaching New Skills Using Applied Behaviour Analysis

In this workshop, families will be provided with an overview of the science of Applied Behaviour Analysis (ABA). Families will learn how to effectively teach or strengthen skills by developing behavioural goals specific to their own child or youth using the principles of ABA. Families will learn how to use these skills in various environments, and with different people. Families will be provided with a worksheet that corresponds with the presentation.

Introduction to Autism Spectrum Disorder

In this workshop, families will develop a better understanding the diagnosis of Autism Spectrum Disorder (ASD) and what it means to their child and family. The workshop will include a description of the diagnostic process and how a diagnosis is determined. Families will learn how genetic and environmental factors are associated with ASD and common issues that are associated with the disorder. Treatment options will be reviewed with an emphasis on evidence based practices. Resources will be given to the families during the training which includes information on the program and available community supports. There will be an opportunity for questions and direction in supporting families' unique needs.

Orientation to the North East Ontario Autism Program

In this orientation, the Ministry of Children and Youth Services (MCYS) Guidelines of the Ontario Autism Program (OAP) will be reviewed. Discussion will be facilitated around how these guidelines will apply to the unique needs of children and families in the North East. This information session provides an overview of the continuum of behavioural services offered by the NEOAP as well as a description of the OAP Family Service Plan. Resources, including information on the program and available community supports, will be given to the families during the training. There will be an opportunity for specific questions in supporting families' unique needs.

Sleep and Toilet Training Workshop

In this workshop, families will identify difficulties that their child or youth has in regards to bedtime routine, falling asleep and staying asleep. Families will identify steps to work on and leave with concrete goals to work on at home. Families will also identify readiness skills for toilet training, and work on steps to build a successful toilet training routine for their child or youth.
