

CORONAVIRUS

WHAT YOU NEED TO KNOW

WHAT IS THE CORONAVIRUS?

People who have this illness usually start with a fever, followed by a dry cough. After about a week, it leads to shortness of breath, and some people require hospital treatment.

WHO CAN GET THE CORONAVIRUS?

The coronavirus is an illness that doctors think is spreading like the flu.

Just like the flu anyone may get it.

WHAT YOU CAN DO TO STAY SAFE?

Wash your hands often.
Cough and sneeze into your elbow or a tissue. Do not touch your face.
If you start to feel sick and have a fever, stay home and call your family or support worker, your doctor's office, or Telehealth at 1-866-797-0000, or your local Public Health Unit.

GET THE FACTS!

People who have the illness and people who have been close to them have been asked to stay home.

This is to help them get better and keep other people safe.

DON'T BE SCARED

You do not need to be afraid. Some of the places I enjoy going like theaters, the gym, and the library are closed right now. They will reopen once the coronavirus is gone. I will be safe in my own home. If you need to go out, try to stay 2 meters away from others.

MEDICATIONS

There are no medications for the coronaviruses. Most people with coronavirus illness will recover on their own.

If you have questions the best thing to do is ask.

You can ask your doctor for information.

Be careful some information you may hear or see online may not be true.
